Fanshawe College - Student Feedback Survey

The Student Feedback Survey (SFS) is an important tool that provides opportunity for continuous improvement in teaching and learning. SFS results offer valuable insight into your teaching practices. Positive changes in teaching practices can lead to improvement in student learning and engagement.

The survey does not require students to enter a response for every statement. As a result, the number of responses for individual statements may vary.

As you read the students' comments watch for useful suggestions, constructive feedback, or recurring themes. Focus your improvement efforts on areas of teaching that students find important.

Please keep the response rate in mind when interpreting the SFS results. If only a small proportion of students in your course completed the survey, the feedback might not represent the viewpoint of an entire class.

Please note: If a survey form is completed for a course that is team taught by multiple instructors a report will generate if 4 or more students complete the survey, regardless of whether or not the individual response threshold was met (Threshold = 4 or more responses).

Comments
Mohammad is very knowledgeable about deep learning concepts and has an effective teaching style. I liked the visual illustrations of concepts to help reinforce my understanding of concepts. Additional demonstrations of concept applications to real world problems would make the course even better.
Very knowledgeable, fair and patient. I do wish he would record the online lectures as it helps with my ADHD to be able to rewind as it is very easy to get distracted during an online lecture.
He is always happy to help if I don't catch a topic and explains in a very polite manner. He always asks for our feedback regarding the tests and projects setups: if it was difficult and what are our primary problems and gaps to cover it during next lectures.
