Fanshawe College - Student Feedback Survey

The Student Feedback Survey (SFS) is an important tool that provides opportunity for continuous improvement in teaching and learning. SFS results offer valuable insight into your teaching practices. Positive changes in teaching practices can lead to improvement in student learning and engagement.

The survey does not require students to enter a response for every statement. As a result, the number of responses for individual statements may vary.

As you read the students' comments watch for useful suggestions, constructive feedback, or recurring themes. Focus your improvement efforts on areas of teaching that students find important.

Please keep the response rate in mind when interpreting the SFS results. If only a small proportion of students in your course completed the survey, the feedback might not represent the viewpoint of an entire class.

Please note: If a survey form is completed for a course that is team taught by multiple instructors a report will generate if 4 or more students complete the survey, regardless of whether or not the individual response threshold was met (Threshold = 4 or more responses).

The Professor/Instructor - Mohammad Noorchenarboo - Aggregate Chart

Note that in the following aggregate chart "Always", and "Most of the Time" have been grouped together as "Positive Agreement" while "Never", and "Not Very Often" have been grouped together as "Negative Agreement".

Overall, the effectiveness of the professor/instructor in this course. - Aggregate Chart

Note that in the following aggregate chart "Excellent", and "Good" have been grouped together as "Positive Agreement" while "Very Poor", and "Poor" have been grouped together as "Negative Agreement".

Rating scale questions, top and bottom ranks

Top Ranks		
1	Provides fair evaluations.	4.20
2	Is respectful of everyone.	4.20
3	Respects diverse ways of thinking and learning.	4.20
Bottom Ranks		
1	Manages class time productively.	3.00
2	Communicates clearly and effectively.	3.00
3	Answers questions clearly.	3.20

Written Response

Please comment on how your instructor Mohammad Noorchenarboo helped your learning in this course or suggest possible changes that would improve your learning. Inappropriate comments will not be reported.

Comments
The teacher seems to have theoretical and practical knowledge, but he is not very didactic, sometimes we cannot understand his explanations. The content of the classes appears not to have been well organized and distributed. It would be interesting to have better defined topics and include only one discipline for time series and not explain advanced concepts without mastering the basics.
– He is really intelligent and is obvious he masters the subject. – Quite often, he is not clear with his asks in class, very frequently people in class do not understand what he asked, what he wants or do not understand how to connect what he just explained with what activity we need to do. His questions are very cryptic. Given this is easy to loss attention and interest quickly, because I often feel lost. We need to ask him multiple times what he's asking for to understand and start working. – This might not be related directed to his performance, but a lot of topics are so extent that is impossible to cover it in a couple of classes (Time Series).
I feel the main issue with this course wasn't the professor, he showed a high level of knowledge in the course material, the main issue was a lack of time to cover the topics, meaning we are rushing to complete the course, and that the course material wasn't simplified enough for the amount of time available, making the course complicated to understand. The second issue is with some of the assignments, since they were not set from the beginning I feel we lacked some code focuses assignments, a thing that actually would have been really helpful for our development as professionals since the few coding assignments we had introduced us to new topics and libraries we hadn't used in other courses. I feel that this course could greatly benefit for a separation into two modules, similar to the keras and NLP courses, with a part 1 and 2, allowing for enough time to cover the topics in detail and to have time for meaningful and carefully planned assignments and activities. Overall I highly recommend the professor, but the course itself could use more refinement.
