Fanshawe College - Student Feedback Survey

The Student Feedback Survey (SFS) is an important tool that provides opportunity for continuous improvement in teaching and learning. SFS results offer valuable insight into your teaching practices. Positive changes in teaching practices can lead to improvement in student learning and engagement.

The survey does not require students to enter a response for every statement. As a result, the number of responses for individual statements may vary.

As you read the students' comments watch for useful suggestions, constructive feedback, or recurring themes. Focus your improvement efforts on areas of teaching that students find important.

Please keep the response rate in mind when interpreting the SFS results. If only a small proportion of students in your course completed the survey, the feedback might not represent the viewpoint of an entire class.

Please note: If a survey form is completed for a course that is team taught by multiple instructors a report will generate if 4 or more students complete the survey, regardless of whether or not the individual response threshold was met (Threshold = 4 or more responses).

1	Communicates clearly and effectively.	4.75
2	Provides results of tests/assignments promptly.	4.79
3	Uses FanshaweOnline effectively.	4.79

Written Response

Please comment on how your instructor Mohammad Noorchenarboo helped your learning in this course or suggest possible changes that would improve your learning. Inappropriate comments will not be reported.

Comments
Professor Noorchenarboo is an excellent professor who cares a lot about his students. He provides clear and organized slides which helps make the topic a lot more manageable and understandable. He covers the topic of course well. He also creates an active learning environment where students can ask questions, and is very approachable.
You can tell that optimization strategies is one of Mohammad's expertise as he is able to explain all the concepts clearly with useful real examples. I would have liked more prompt communication of changes made to class times and due dates but he responds to emails quickly so that makes up for it.
Very good and helpful professor.
Thank you so much for teaching us over the last three semesters. Your classes were always clear and easy to understand. I loved attending your classes, even though I could not answer the questions. :D Thank you again for your excellent teaching and support.
I think he is a great professor. He explains the material in a simple way and repeats it until students understand.
I would include more questions in the quiz sessions and also administer quizzes before classes start, so that we can measure the students' evolution.
For the midterm and final quizzes, I suggest sticking to more general questions, focused on concepts and one or two cases.
Professor Mohammad is a great teacher. He knows his lecture very well and can explain very details. He was the best.
Mohammad was clear, supportive, and truly made sure we understood the material. He explained concepts well, was approachable, and fair with grading. Adding more hands-on practice would make the course even stronger.
professor Mohammad is G.O.A.T professor
Professor is giving his 100% every time.
more consistently, which helped reinforce my understanding. I also appreciated the use of external references during lectures, as they provided better context and made the concepts easier to relate to real applications. In particular, the layman-term examples at the bottom of the slides were very helpful for simplifying complex ideas, and I would love to see more of these included in future lectures.
One small challenge for me is the in-class question-and-answer sessions. Even when I understand the answer, I sometimes struggle to explain it clearly and feel shy speaking in front of the class. This makes it harder for me to participate, even though I am engaged with the material.
Overall, I really enjoyed the course, but I feel that some topics could benefit from a bit more explanation, as a few concepts still feel unclear to me. Thank you for the effort and support you put into teaching this course.
He is a really nice instructor. He explains everything and clears all the doubts. He always tries to engage students in class activities. And the course helped build a solid understanding of optimization techniques that was designed by the Professor.
Mohammad really makes sure students get the concepts before moving on. He encourages everyone to participate, making the class a two-way conversation. His focus on each student helps them feel motivated to join in the lessons. He tries to be approachable and treats students like real people, not just students.
He has deep expertise and extensive experience in the area he teaches. He's worked a lot with medical data, so he has strong experience with healthcare data specifically. He's great at figuring out exactly what students are asking and always gives clear, accurate answers.
